-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 June 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by the Flahaut et al. Acta mater. article, the Dong et al. Mater.Sci.Eng. article, or the Chen et al. Advanced Engineering Materials article. Particularly, the Abstract of Flahaut, the bottom right hand portion of page 84 of Dong, or the top right hand portion of page 516 of Chen disclose carbon nanotubes dispersed uniformly or homogeneously in a metallic matrix, thus anticipating the instant claim.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over China Abstract 1465729, the Bian et al. Advanced Materials article, or the Bian et al. Applied Physics Letters article.

The China Abstract and the Bian articles disclose carbon nanotubes dispersed in a metallic matrix. These references do not use the phrase “homogeneously dispersed” as presently claimed. The examiner’s position is that the nanotubes of the prior art are present throughout their respective matrix in a sufficiently uniform manner that one of

skill in the art would consider them to be homogeneously dispersed. Thus, a prima facie case of obviousness is established between the China Abstract or the Bian et al. articles and the presently claimed invention.

5. In a response filed June 15, 2006, Applicant suggests that the morphology of the inventive products is distinct from those of the prior art references. However, Applicant has provided no data or other indications of any specific differences between the products as disclosed in the various prior art references and those defined by instant claim 10.

6. Claims 1-9 are allowable over the prior art of record. The prior art does not disclose or suggest a series of process steps as defined in independent claim 1.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
